PROFESSIONAL SUMMARY

Product Manager who builds. 5+ years shipping products across FinTech, EdTech, and marketplace platforms - often mid-chaos and mid delivery. Built Skilladder's AI assessment platform from prototype to primary product, cutting deployment time by 85% and growing adoption to 6 enterprise clients. I thrive in high stakes environments and I have built platforms from scratch using AI tooling. I am typically a bridge between strategy and hands-on execution without losing either. I communicate across levels and leave behind structure outlasting my engagements.

WORK EXPERIENCE

05/2025 - Present

Product Lead, Strategy and Operations (Part-time from 04/2026)

Skilladder AI | Remote

AI-powered skills assessment and talent workflow platform for skills-based hiring across Africa.

- Built the company's primary product from zero, a multi-tenant AI assessment platform with built-in AI scoring, proctoring, and participant management.
- Grew the platform to 6 recurring enterprise clients by owning the full lifecycle from research, requirements gathering, design to hands-on development with Cursor and Claude Code; and continuous iterations.
- Managed OKR setting across the product organisation by aligning a cross-functional team around measurable quarterly outcomes.

05/2024 - 02/2026

Product Manager

Tellerpoint | Remote

Agency banking platform enabling financial institutions to deliver services to underserved communities.

- Drove full product strategy and development lifecycle for the Collections Mobile and Web App through agile sprints and cross-functional coordination.
- Delivered the Tellerpoint Mini product end-to-end by managing strategy, roadmap, and development lifecycle.
- Improved product features through extensive user interviews, translating actionable feedback into prioritised enhancements.
- Increased team productivity by implementing agile practices through weekly syncs and scrum rituals.

05/2024 - 05/2025

Product Manager (Consultancy)

Devlabs Africa Limited | Remote

Product consultancy providing strategy and development services for African tech startups.

- Drove Carbin Africa to #1 on Tech Cabal's "25 Startups to Watch in 2025" by optimising dealer inventory management workflows and platform adoption.
- Delivered GPS's real-time integrated delivery ecosystem by implementing live tracking and automated dispatch features; from discovery to launch.
- Built Dotalinks' order and delivery management platform through deep stakeholder research and cross-functional engineering collaboration.

09/2022 - 05/2024

Product Manager

Switch Recycling | Lagos, Nigeria

Waste management company with mobile/web apps and integrated fintech solutions in Nigeria.

- Increased user engagement by 15% through UX improvements to the Request feature, directly improving waste collection efficiency.
- Delivered the waste management app by analysing user data and market trend; reduced support queries via structured product training and adoption materials
- Introduced agile rituals (weekly syncs, scrum ceremonies) that meaningfully improved team delivery cadence across the cross-functional team.

05/2022 - 07/2022

Associate Product Manager

Treford | Lagos, Nigeria

Product management training and incubation programme.

- Developed BetaCare, an electronic health record product, selected as the top solution by pitching scalability and viability to a panel of senior stakeholders.
- Built a comprehensive product strategy by defining user personas, business models, interactive prototypes, and a prioritised roadmap.

EDUCATION

12/2013 - 09/2018

Bachelor of Laws (LL.B)

Lagos State University | Lagos, Nigeria

CERTIFICATIONS

08/2023

Product Academy Series 2023 - McKinsey Academy

08/2022

Product Led Growth Micro-Certification (PLGC) - Product School

07/2022
