PROFILE

Product leader and hands-on builder delivering AI products, customer integrations and financial systems. Lead product and serve as primary engineer at Skilladder, serving 32+ enterprise clients and assessing roughly 48,000 candidates. Work spans customer discovery, implementation, AI rollout and production delivery.

EXPERIENCE

Skilladder AI · Lead AI Product Manager, Operations

May 2025 - Present · Remote

- Led product and served as primary builder for the company's AI assessment platform, taking it from idea to production for 32+ enterprise clients including Cowrywise, ALX, Honeywell Group and Kuda.
- Delivered assessment and certification workflows for Nigeria's 3MTT programme, alongside enterprise hiring workflows. About 109,000 completed attempts by roughly 48,000 candidates.
- Implemented AI assessment generation, open-ended response grading and production RAG connecting language models to proprietary data.
- Rolled out AI grading through two weeks of shadow testing, confidence scores and one-click human override, reducing grading turnaround from days to hours.
- Defined assessment APIs around triggering assessments, retrieving results and webhooks. Built the first endpoints and iterated with two customer design partners.
- Investigated candidate drop-off and shipped an accessibility rebuild in three days, improving screen-reader support, keyboard navigation and low-end Android usability. Completion improved and a client recovered lost candidates.

Tellerpoint · Product Manager

May 2024 - February 2026 · Remote

- Managed product delivery for UnionDirect, Union Bank of Nigeria's agency banking platform, spanning agent mobile apps, a terminal app and an admin dashboard.
- Partnered with Union Bank's information security team to triage and close 16 vulnerability findings while keeping planned quarterly delivery on track.
- Coordinated PCI DSS attestation documentation and NDPA compliance work alongside delivery of Tellerpoint Mini and the Collections applications.

Devlabs Africa Limited · Product Manager, Consultancy

May 2024 - May 2025 · Remote

- Led product strategy for Carbin Africa's dealer inventory workflows; delivered real-time tracking and automated dispatch for GPS, and order and delivery management for Dotalinks.

Switch Recycling · Product Manager

September 2022 - May 2024 · Lagos, Nigeria

- Increased user engagement by 15% through improvements to the waste collection Request feature; used customer data and research to prioritise product changes.

Treford · Associate Product Manager, Training Programme

May - July 2022 · Lagos, Nigeria

- Developed BetaCare's electronic health record concept, prototype and roadmap, selected as the programme's top solution.

PROJECT WORK

Orderflow and Autopapers NG · WhatsApp Commerce Projects

Solo development · April 2026 - Present

- Built and launched a commerce platform in under five months, with three live verticals, a Kotlin/Spring Boot backend and a Next.js dashboard.
- Integrated Rubies and Squad payments, and built settlement calculations from ledger entries.
- Connected thermal printers and QR scanners through MQTT, implemented role-based access controls and delivered database migrations without downtime.

Harvesters Workers System

- Built workforce workflows with training and certificates, and event registration.

GRWTEE

- Shipped an AI styling mobile and web app using React Native, Expo, Next.js and Supabase.
